

TOX®-Powerpackage

Product Training

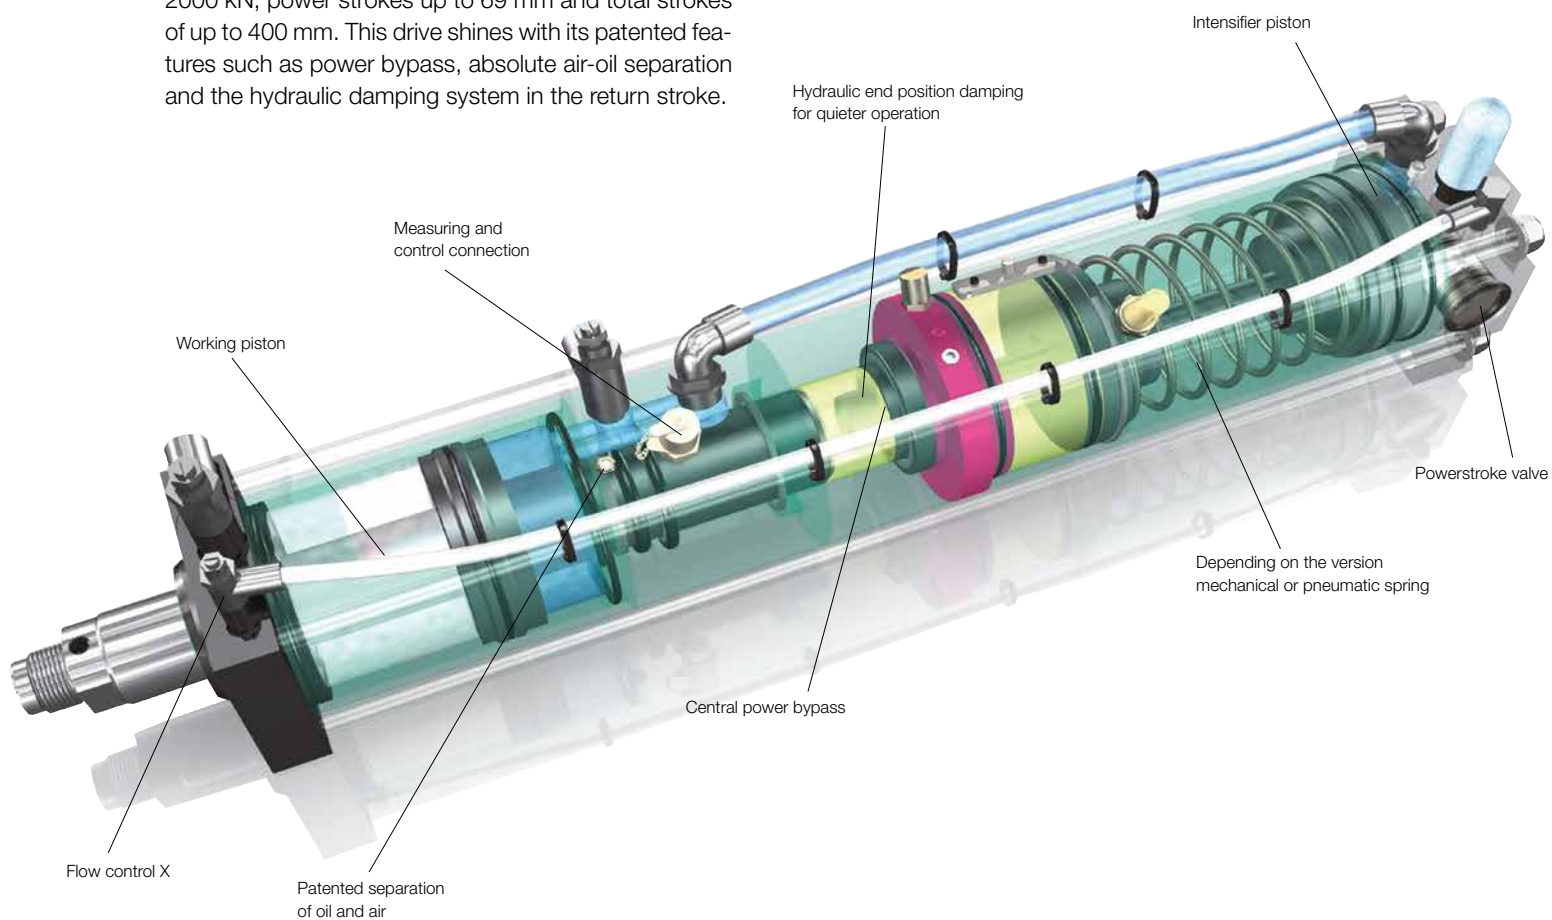

TOX®-Powerpackage

Pneumohydraulic drives from 2 - 2000 kN

The pneumatic drives from TOX® PRESSOTECHNIK are known worldwide under the name TOX®-Powerpackage, the energy-saving pneumatic cylinders with integrated oil system and automatically deployed power strokes.

The range of the devices offers press forces from 2 to 2000 kN, power strokes up to 69 mm and total strokes of up to 400 mm. This drive shines with its patented features such as power bypass, absolute air-oil separation and the hydraulic damping system in the return stroke.

Advantages

- Few moving parts
- Low energy consumption
- High wear resistance
- High stroke frequency

Designed down into the last detail

Throughout the decades numerous improvements have flowed into the TOX®-Powerpackage. The ingeniously simple basic principle has remained.

The training session

Get to know the TOX®-Powerpackage

We offer you a one-day training session to get to know the TOX®-Powerpackage in detail. The training consists of theoretical instruction and a practical part. It can be adjusted to special wishes and cases of application and be aligned to the requirements of the participants.

Target group:

The training is directed at planners, project developers, process engineers, control engineers and maintenance staff.

What to bring along

For the practical part please bring along safety shoes, safety gloves and, if possible, safety goggles.

Final registration

4 weeks before the training date. After reservation, you will receive a confirmation for the booked training course.

Attendance fee

525€ (plus sales tax) per participant

Training sequence

8:00 / 8:30 a.m.	Welcoming and introduction - The company TOX®PRESSOTECHNIK - TOX®-Technologies
Pause 15 minutes	- TOX®-Powerpackage: set-up and function, control as well as setting and maintenance
12 midday	Lunch in the TOX® canteen and break
1 p.m.	- Disassembly and assembly of a TOX®-Powerpackage - Assembly aids
Pause 15 minutes	- Seal handling - Refilling of oil and venting - Commissioning
Around 5 p.m.	End of training session

Deadlines

When:	All current deadlines are available on our website de.tox-pressotechnik.com/service/schulung
Where:	TOX® PRESSOTECHNIK Riedstraße 4 88250 Weingarten / Germany
Registration:	Please 4 weeks before the training date at: schulungen@tox-de.com
